

**Technical Data Slop Collector  
1000 KW-FP with used water  
recycling**

Large glass fiber slop collector mounted on a special deep-seated chassis. with push handle and robust grid, for manual emptying.

With integrated automatic emptying system, level control and fine filter system inclusively robust grid with slosh baffle.

For applications under the car (in the pit) and on the floor

Technical data	1000 KW-FP
Overall filling capacity	approx. 80 Liter
Movable volume without risk of overflowing	approx. 50 Liter
Delivery pump head	4 m
Flow rate	~ 8-10 l/min
Filter	25 µm
Power specification	1P-N-PE/230V/50Hz
Dimensions	930 mm x 630 mm x 220 mm
Capacity	0,35 KW
Load	80 kg
Level control	electronic

Technical modifications reserved.
